

VersiFlex™ & VersiFold™

Maximum flexibility, Maximum value

Today's business environment requires more flexibility than ever. Businesses need products that accommodate portability requirements and improved utilization of space. VersiFlex™ and VersiFold™ systems offer the latest in a growing segment of work-space design that incorporates the portability of roll-and-fold screens with the acoustics of an integrated cubical system.

Independent laboratory testing shows VersiFlex™ to have a maximum Noise Reduction Coefficient of 80% compared to residential interior walls that are rated at 30%.

Benefits

- Useful for portable or permanent installations
- Superior sound control
- Maximize space utilization
- Quick and easy to set-up
- Enhances privacy in business settings
- Panels flush with floor for increased privacy and acoustics

Features

- Durable, stain-resistant fabrics available in three popular "quiet" colors
- Ridged internal frame increases strength and durability
- No tools required for set-up
- VersiFlex™ rolls up for easy storage
- Heavy stitch line increases durability and flexibility

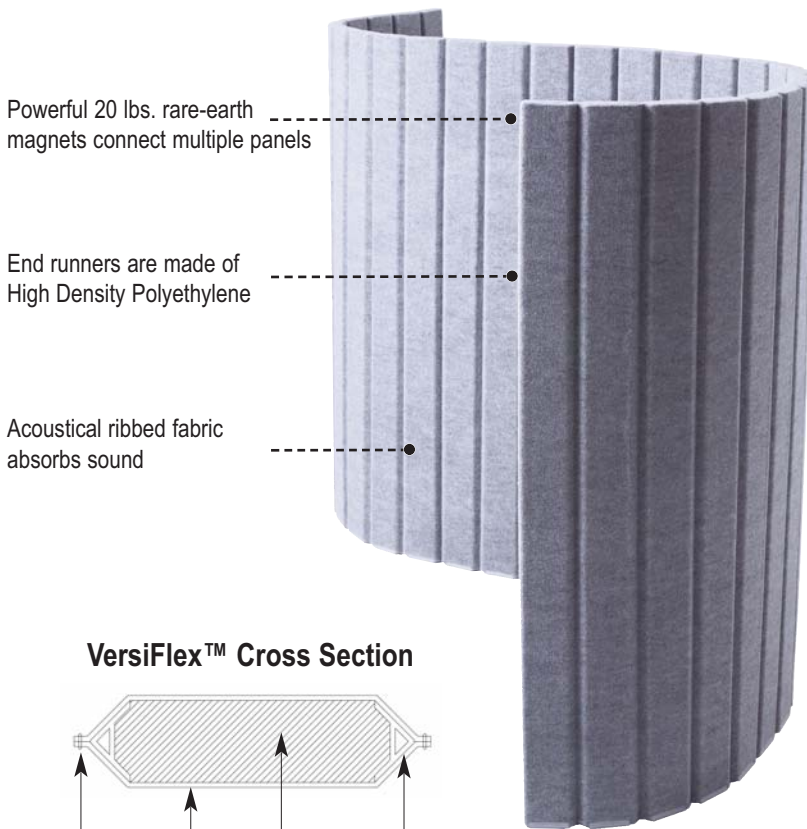

Durable Lightweight Tables & Chairs

VersiFlex™ & VersiFold™

Maximum flexibility, Maximum value

Type	Panel Thickness	Panel Width	Height	Length	Weight
VersiFlex™	2.25"	6.25"	78"	8'	57lbs
VersiFlex™	2.25"	6.25"	78"	12'	85lbs
VersiFold™	2.25"	24"	78"	8'	36lbs

VersiFlex™
