

General Instructions:

Many MityLite upholstered chairs resist oil and water-based stains, however; you should still clean up spills and stains right away.

- Quickly blot up stain or spills with an absorbent cloth. Be careful not to rub the stain deeper into the fabric.
- If the stain cannot be removed completely by blotting, use the appropriate spot cleaning technique according to the chart below. Always test treatments on a hidden area first to make certain the fabric and color will not be damaged.
- If a spill is solid or semi-solid (like butter or ketchup), remove the excess by gently lifting it with a dull knife.

Cleanability Code:

Your furniture may be labeled with an industry cleanability code. The code is as follows:

| | |
|----|---|
| W | Use only water based cleaning agents or foam. Mix 2 tablespoons ammonia or ammoniated detergent, such as Ajax™ liquid, to 1 quart of water. Wipe the stain gently with a cloth dampened with this solution. Continue, turning the cloth so you're always using a clean portion. |
| S | Use only mild, pure, water-free dry cleaning solvents, such as Energine™ or Carbona™. Wet a cloth with the spot cleaner and follow the same procedure as described above. |
| WS | Either of the above methods may be used. |
| X | Clean fabric only by vacuuming or light brushing to remove soil. Do not use liquid agents of any type. |

When professional cleaning is necessary, supply a copy of this sheet.

Stain and Spot Removal Chart:

This cleaning chart is provided only as a service and should not be interpreted as a warranty. Results may vary in individual cases.

| Type of Stain | What to Do |
|---|---|
| Wine, alcoholic beverages, or soft drinks | See (W). |
| Chocolate or coffee | Sponge with lukewarm water. |
| Deodorants or grease | See (S). |
| Fruit or berry stains | Treat with cold water. |
| Pencil lead or rubber cement | See (S). Follow with a small amount of ammoniated liquid detergent. Rinse thoroughly. |
| Urine, mucilage, perspiration | See (W). Follow with a small amount of ammoniated liquid detergent. Rinse thoroughly. |
| Vomit | Treat with cold water. Follow with unseasoned meat tenderizer. Let sit for 10 - 15 minutes. Rinse, let dry, vacuum. |
| Mud | Lift away whatever can be removed easily with a dull knife. Let dry, then vacuum. If stain persists, clean with a cloth dampened with an ammonia-water solution. See (W). |
| Candle wax | Remove surface wax with a dull knife. See (S). Or cover spot with several thicknesses of paper towels and apply a warm iron. |
| Chewing gum | Remove surface gum with dull knife. See (S). |
| Ink or ballpoint pen | Use rubbing alcohol. Also see (W). |
